RE: Updating Notice of Intent of Pelican Point Rock Products

Dear Mr. Jensen:

We would like to request an extension of 60 days for the map showing current surface facilities and disturbances, which was requested by the State of Utah, Division of Oil, Gas and Mining (DOGM).

At this time Pelican Point Rock is reviewing the most effective way to map the area, whether by ground or aerial survey. As a result, an extension is requested which would allow for proper analysis of this survey.

Your consideration in this matter would be very much appreciated. Please contact John Sather at 801.430.4964 at Pelican Point Rock Products with your response to this request.

Sincerely,

John Sather
President
